Certified DPO-GDPR

DATA PROTECTION OFFICER -
GDPR

 **INTEGRA**
SOLUTION
Simplify a complex world

Why should you attend?

After mastering all the necessary concepts of General Data Protection Regulation (GDPR), you can sit for the exam and apply for a “PECB Certified Data Protection Officer” credential. By holding a PECB Certified Data Protection Officer Certificate, you will demonstrate that you thoroughly understand the gap between the General Data Protection Regulation and the current organizational processes including: privacy policies, procedures, working instructions, consent forms, data protection impact assessments, in order to associate organizations in the adoption process to the new regulation.

PRICE: 1.490,00 EUR+VAT 18%
(including exam, certification,
materials, lunch, coffee break)

This training is based on both the Regulation and best practices

Lecture sessions are illustrated with practical questions and examples

Practice exercises are similar to the Certification Exam

Who should attend?

Project managers or consultants wanting to prepare and to support an organization in the implementation of the new procedures and adoption of the new requisites presented in the GDPR

DPO and Senior Managers responsible for the personal data protection of an enterprise and the management of its risks

Members of an information security, incident management and business continuity team

Expert advisors in security of personal data

Technical experts and compliance experts wanting to prepare for a DPO job

Learning Objectives

Gain a comprehensive understanding of the concepts and approaches required for the effective alignment with the General Data Protection Regulation

Understand the new requirements that the General Data Protection Regulation brings for EU organizations and non-EU organizations and when it is necessary to implement them

Acquire the necessary expertise to support an organization in assessing the implementation of these new requirements

Learn how to manage a team implementing the GDPR

Gain the knowledge and skills required to advise organizations how to manage personal data

Acquire the expertise for analysis and decision making in the context of personal data protection
